We have experts with RICS and MAI accreditation who have been working in markets for many years and have a huge database of knowledge to draw on.

Hospitality assets, such as hotels and resorts, are complex real estate types, with significant land use value depending on their operational performance. Their performance is susceptible to greater market fluctuations, location issues, management sophistication and high capital investment than other real estate such as office or retail. Because of this, the valuation of hospitality assets requires a special market understanding and product expertise.
